UPDATED STATUS OF CONCURRENT LITIGATION

Pursuant to a telephone request from Special Programs Examiner Phan on April 27, 1999, applicant hereby provides an updated status report on the concurrent litigation, in view of which the proceedings in the above-identified reissue application are suspended.

The concurrent litigation involves United States patent 4,775,741 assigned to Linear Technology Corporation ("LTC"), which shares a common filing date with LTC's U.S. Patent 4,823,070 now in reissue. In the litigation, the defendant Micrel raised the defense that claims of LTC's '741 patent are invalid in view of the on-sale bar of 35 U.S.C. § 102(b).

On April 1, 1997, the Patent and Trademark Office issued a Decision on Request for Suspension of Action that suspended the proceedings in the above-identified reissue application pending the outcome of concurrent litigation.

On September 20, 1997, applicant informed the Office that a trial date for the subject litigation had been set for January 20, 1998. That trial date was postponed until April 7, 1998.

On April 7-10, 1998, the Court conducted a trial on the on-sale bar defense raised by the defendant Micrel. After the trial, the parties submitted Post-trial Proposed Findings of Fact and Conclusions of Law.

On November 12, 1998, LTC notified the Court of a recent decision by the United States Supreme Court in the case of Pfaff v. Wells Electronics, Inc., 119 S. Ct. 304 (1998). In March 1999, the parties submitted additional notices to the Court concerning recent on-sale bar decisions.

The Court continues to have the matter under submission.
